INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference							
P005018-PCT	FOR FURTHE	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)					
International application No. PCT/BR 02/00175	International filing 06.12.2002	date (day/month/year)	Priority date (day/month/year) 06.12.2002				
International Patent Classification (IPC) or both national classification and IPC C08K5/04							
Applicant COGNIS BRASIL LTDA. et al.							
 This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36. 							
2. This REPORT consists of	2. This REPORT consists of a total of 5 sheets, including this cover sheet.						
	These annexes consist of a total of sheets.						
This report contains indicate	3. This report contains indications relating to the following items:						
I ⊠ Basis of the op	inion						
II ☐ Priority							
III 🔲 Non-establishr	nent of opinion with regard	to novelty, inventive ste	p and industrial applicability				
IV ☐ Lack of unity o			p and industrial applicability				
V 🛭 Reasoned stat citations and e	ement under Rule 66.2(a)(ii xplanations supporting such	i) with regard to novelty, n statement	inventive step or industrial applicability;				
VI 🗌 Certain docum	ents cited						
	in the international applica	tion	1				
VIII □ Certain observations on the international application							
Date of submission of the demand		Date of completion of	this report				
10.05.2004		07.07.2004

l.	Basis	of the	report

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Description, Pages						
	1-	4	as originally filed				
	CI	aims, Numbers					
	1-	11	as originally filed				
2	. W lar	With regard to the language , all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.					
		These elements were available or furnished to this Authority in the following language: , which is:					
		the language of pub	olication of the international application (under Rule 48.3(b)).				
		the language of a tr Rule 55.2 and/or 55	anslation furnished for the purposes of international analysis to				
3.	Wi	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:					
		contained in the inte	ernational application in written form.				
			e international application in computer readable form.				
		furnished subsequently to this Authority in written form.					
		furnished subsequently to this Authority in computer readable form.					
		The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.					
		The statement that t listing has been furn	he information recorded in computer readable form is identical to the written sequence ished.				
4.	The	amendments have re	esulted in the cancellation of:				
		the description,	pages:				
		the claims,	Nos.:				
		the drawings,	sheets:				
5.		This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).					
			eet containing such amendments must be referred to under item 1 and annexed to this				
6.	Add	Additional observations, if necessary:					

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/BR 02/00175

- V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- 1. Statement

Novelty (N) Yes: Claims 1-11

No: Claims

Inventive step (IS) Yes: Claims 1-11

No: Claims

Industrial applicability (IA) Yes: Claims 1-11

No: Claims

2. Citations and explanations

see separate sheet

EXAMINATION REPORT - SEPARATE SHEET

Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following documents:

D1 = US-A-2001/0044486

D2 = GB-A-934689

- 2.1. Document D1, which is considered to represent the most relevant state of the art, discloses (cf. claims 1 and 2 and examples) a plastisol composition comprising a PVC homopolymer, a primary plasticizer (e.g. esters of phthalic acid, benzoates, organic phosphates, diesters of dicarboxylic acids,..) and a C₁-C₂ alkyl monoester of a fatty acid as a secondary plasticizer (e.g. methyl esters of rapeseed oil fatty acids). The examples of D1 show (table 1) that the addition of the secondary plasticizer has no effect on the shore A hardness. The problem solved in D1 was (paragraph [0005] and [0006, first 5 lines]) to find substances which are suitable to replace the phthalic acid esters by up to 50% without any adverse effect on the properties.
- 2.2. The subject-matter of independent claims 1, 4 and 8 differs from the disclosure of D1 in that the primary plasticizers are esters of fatty acids with 8 to 24 carbon atoms and isobutanol and contain at least one epoxy group per molecule.
- 2.3. The subject-matter of independent claims 1, 4 and 8, as well as of dependent claims 2, 3, 5-7 and 9-11 is therefore new (Article 33(2) PCT).
- 3.1. The problem to be solved by the present invention is regarded as to provide phthalic acid ester free plasticizer for PVC, which lead to products with the same shore A hardness and significant reduced viscosity compared with PVC containing dioctylphthalate as plasticizer.
- 3.2. The solution to this problem proposed in independent claims 1, 4 and 8 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons: Although, D2 discloses (claim 8 and examples) PVC resin composition comprising

INTERNATIONAL PRELIMINARY

International application No. PCT/BR02/00175

EXAMINATION REPORT - SEPARATE SHEET

as plasticizer only a mixture of lower alkyl alcohol esters of epoxidized fatty acids (e.g. isobutyl ester of epoxidized linseed oil fatty acids, example II), the cited literature does not suggest to combine isobutyl esters of fatty acids, which contain at least one epoxy group per molecule with one or more methyl esters of fatty acids with 16 to 18 carbon atoms to obtain plasticized PVC compositions with good shore A hardness and low viscosity.

- 3.4. Therefore, the subject-matter of independent claims 1, 4 and 8 meets the requirements of Article 33(3) PCT.
- 3.5. Claims 2, 3, 5-7 and 9-11 are dependent on claims 1, 4 and 8, respectively, and as such also meet the requirements of the PCT with respect to inventive step.
- 4. For all claims (1-11) industrial applicability is acknowledged.
